<http://www.psychologie.uni-freiburg.de/zentrale.einrichtungen/energieeffizienz>

I. Technical Models and Interventions

II. Psychological Interventions: Behavior Change

III. Energy Units and in Money: Main Results

- Power Consumption went down by 25 %
- Heating went down by 30 %
- People are more aware of their consumption of energy
- Malfunctions are recognized earlier

IV. 100% Bonus supplied through the Sustainable University Project

Bonus [€]= (Mean energy consumption in 2003-2005 - energy consumption in current year) * current prices
